Bekobod, Toshkent

Ta'lim

Guliston Davlat universiteti, Axborot tizimlari va texnologiyalari yo'nalishi, 1-kurs talabasi (2025~hozirda)

O'zim haqimda

Men Python dasturchiman va backend yo'nalishida rivojlanib bormoqdaman. Python dasturlash tilini o'quv kurslari orqali o'rganganman va hozirda universitet talabasi sifatida bilimlarimni amaliyot bilan mustahkamlab kelmoqdaman.

Asosan Django va REST API texnologiyalari bilan ishlayman. Ushbu yoʻnalishda bir nechta amaliy loyihalar ishlab chiqqanman va ularni GitHub profilimda eʼlon qilganman.

Rasmiy ish tajribam hali mavjud emas, ammo yangi texnologiyalarni tez oʻrganish, muammolarni mustaqil hal qilish va jamoada ishlashga tayyorman.

Ko'nikmalar

- Backend Development:

Python, Django, Django Rest Framework (DRF), RESTful API dizayn va yaratish (authentication, permissions, serializers, viewsets)

- Database & ORM:

PostgreSQL (CRUD operations, relational modeling, query optimization)

Django ORM bilan ishlash

- Deployment & DevOps:

Linux serverlar, Nginx, Gunicorn, Docker, Docker Compose

(containerization, multi-service orchestration, production deployment)

- Version Control & Collaboration:

Git, GitHub (branching, pull request, code review, CI/CD workflow)

- Web & Networking Basics:

HTTP, JSON, REST principles, API testing (Postman / Swagger)

- Testing & Debugging:

Unit testing, Django Test framework, logging va error handling

- Optional / Learning:

Celery (task queue), Redis (caching), Gunicorn workers tuning
